SDG 11.4 Sustainable Practices

SDG 14 - Indicator 11.4.1 Sustainable practices targets

Universitas Sriwijaya is committed to promoting more sustainable commuting practices as part of its efforts to create an environmentally friendly campus and support the Sustainable Development Goals (SDG), particularly SDG 11: Sustainable Cities and Communities. A tangible demonstration of this commitment is the provision of public transportation services such as campus buses and shuttles, which facilitate mobility for students, faculty, and staff. These facilities not only reduce the reliance on private vehicles but also contribute to lowering carbon emissions on campus. Furthermore, to encourage the use of public transportation, UNSRI has initiated discussions about providing easier access to the Light Rail Transit (LRT) system for UNSRI students. The university is also developing a feeder shuttle bus system connecting the LRT to facilitate student accommodations.

In addition to public transportation, UNSRI has adopted electric vehicles as part of its sustainability initiatives. The campus has introduced 30 electric bicycles, available for use by faculty, staff, students, and the academic community for operational activities within the campus. These electric vehicles are environmentally friendly as they produce no direct emissions and represent a concrete step by UNSRI towards a cleaner energy transition. Through these initiatives, Universitas Sriwijaya demonstrates its commitment to fostering sustainable commuting, aligning closely with SDG 11 by creating a more inclusive, efficient, and environmentally sustainable campus transportation system.
