SDG 11.4 Sustainable Practices

SDG 11 – Indicator 11.4.2 Promote sustainable commuting

Universitas Sriwijaya actively promotes sustainable commuting practices to support its vision of an environmentally friendly campus in alignment with Sustainable Development Goal (SDG) 11: Sustainable Cities and Communities. The university provides public transportation options, including campus buses and shuttles, to facilitate mobility for students, faculty, and staff. These initiatives aim to reduce the reliance on private vehicles, thereby significantly cutting campus-wide carbon emissions. In addition to these efforts, UNSRI has embraced the use of electric vehicles as part of its sustainability agenda. The campus has made 30 electric bicycles available for operational activities, benefiting faculty, staff, students, and the wider academic community. These zero-emission bicycles exemplify UNSRI's commitment to transitioning to cleaner energy sources while providing eco-friendly transportation options. Through these comprehensive measures, UNSRI demonstrates leadership in advancing sustainable urban transportation and fostering a greener, more inclusive academic environment.
