SDG 11.4 Sustainable Practices

SDG 11 – Indicator 11.4.3 Allow remote working

Universitas Sriwijaya actively supports remote working and distance learning for its lecturers, staff, students, and employees by utilizing advanced information systems and digital tools. To facilitate effective distance learning, UNSRI has developed an official E-learning website as its Learning Management System (LMS). Through this platform, lecturers and students can access all resources necessary for conducting and participating in classes, enabling seamless remote learning experiences.

In addition to the LMS, UNSRI has created its own video conferencing application, *USCAMZ*, designed to support virtual meetings and lectures. This innovation showcases UNSRI's commitment to providing accessible and reliable tools for online collaboration and education. By leveraging these technologies, Universitas Sriwijaya ensures that teaching, administrative tasks, and communication can continue effectively, even outside the traditional office or classroom environment, reflecting the university's dedication to adaptability and modernization in education and work practices.
