

14.4 Water sensitive waste disposal SDG 14 – Indicator 14.4.1 - Water discharge guidelines and standards

UNSRI Cooperates with Third Party in Handling Hazardous Toxic Waste

Hazardous Toxic Waste (Bahan Beracun Berbahaya, "B3") is waste that contains toxic and hazardous substances that can interfere with health, damage the environment, and threaten the survival of humans and other organisms. In handling hazardous toxic waste, Universitas Sriwijaya (UNSRI) collaborates with PT Biuteknika Bina Prima. This cooperation activity contains a contract in cooperation for transportation services and destruction of hazardous toxic waste in the form of solid and liquid waste in accordance with the permits owned with an environmentally friendly incineration system. This cooperation is carried out in an effort to support the government in preserving the sustainability, health and safety of the environment and humans.
