SDG 13
Climate Action

13.3 Environmental education measures

SDG 13 – Indicator 13.3.2 Climate Action Plan, shared

Universitas Sriwijaya (Unsri) actively conducts various research and community engagement initiatives related to climate change issues. Through these efforts, Unsri aims to contribute valuable insights and practical solutions to address the challenges posed by climate change. Researchers and experts at Unsri collaborate on projects focusing on climate change adaptation, mitigation strategies, environmental conservation, and sustainable development. Additionally, the university actively engages with local communities, policymakers, and non-governmental organizations to raise awareness about climate change impacts and promote environmentally friendly practices. Unsri's commitment to research and community outreach underscores its dedication to finding innovative solutions and creating positive change in the face of climate change.

A delegation from Sriwijaya University, led by the Vice-Rector for Planning and Cooperation, visited the National Institute of Forest Science (NIFoS) in Seoul, South Korea from June 20th to 24th, 2023. This visit was part of the Unsri's climate action plan, specifically focusing on the University's internationalization efforts. During the visit, a Memorandum of Understanding (MoU) was signed between UNSRI and NIFoS to foster collaborative research, scientific conferences, exchange programs, and initiatives related to climate action. The MoU also outlines areas of cooperation, including collaborative research projects, joint scientific events, information exchange, personnel exchange, and other mutually beneficial programs.
