Seminar Nasional Lahan Suboptimal Ke-11 Tahun 2023 Pusat Unggulan Riset Pengembangan Lahan Suboptimal (PUR-PLSO) Universitas Sriwijaya

With the subject "Sustainable Revitalization of Suboptimal Land through Precision Agriculture and Empowering Millennial Farmers," Sriwijaya University's Center of Excellence for Suboptimal Land Development Research (PUR-PLSO) hosted its 12th National Seminar on Suboptimal Land on October 21, 2024. The seminar, a combined online and hotel Beston event in Palembang, was held in conjunction with the university's 64th and the Faculty of Agriculture's 61st anniversaries. In his opening remarks, Rector Prof. Dr. Taufiq Marwa praised PUR-PLSO's twelve years of devoted knowledge-sharing. The promise of precision agriculture, utilizing AI, IoT, and mechanization to improve farming production for national food security, was emphasized by keynote speakers who included specialists in agronomy, animal husbandry, aquaculture, and agricultural technology.

The conference had 139 papers on topics such crop and livestock management, environmental stewardship, and smart farming innovation, and it drew about 500 participants, including scholars, researchers, and practitioners from different parts of Indonesia. Nine authors for the best papers and fourteen presenters from universities and research organizations across the country were honored by PUR-PLSO in recognition of their exceptional achievements. The Vice Dean for Student Affairs, along with the organizing team, Prof. Dr. Siti Herlinda and Prof. Dr. Sofia Sandi, presided over an award ceremony to wrap up the event.
