SDG 15 – Indicator 15.2.2 Sustainably farmed food on campus

PUSRI GREEN THE ENVIRONMENT

Pusri together with Sriwijaya University carried out environmental greening activities and supported the Net Zero Emission program on January 25 2024 at Firdaus Park which is located on the Sriwijaya University Indralaya Campus. The activity was carried out by planting 2000 fruit tree seedlings. This can help the greening process and also provide food within the campus environment.
