SDG 17

Partnerships for the Goals

17.3 Publication of SDG reports

SDG 17 – Indicator 17.3.14 Publication of SDG 14 Reports

Universitas Sriwijaya regard that SDGs 6 and SDGs 14 are 2 inseparable SDGs. Both focus on ensuring the sustainability of life below water. Specifically, the SDG 6 aims to improve access to clean drinking water and sanitation, while the SDG 14 focuses on protecting water ecosystems by reducing pollution levels and preserving biodiversity. By implementing effective water conservation strategies and waste water treatment practices, the universitas can help ensure a sustainable future for our water ecosystems and all the creatures that call it home. The university restocks 20 species of indigenous fish in reservoirs on campus.
