Quality Education

4.3 Lifelong learning measures

SDG 4 – Indicator 4.3.1 Public resources (lifelong learning)

In order to develop scientific insight and concern for community needs, Universitas Sriwijaya ensures easy access to education because it is the right of every citizen. As an institution primarily focused on education, Universitas Sriwijaya open opportunities for the entire Indonesian community to access education provided by the university. This is evidenced by easy access to library services and journals through an open system that can be accessed by everyone through the available website. Education is also provided through other platforms that are now close to the community, such as YouTube and Instagram. Officially, the faculties at Universitas Sriwijaya also offer Massive Online Open Courses (MOOCs) and open educational content. There are many literacy sources that students use to broaden their scientific horizons, so that students can easily reach reading sources legally at low cost. In this way, student can easily deepen their knowledge in higher education.
